**From a Southern California activist on the wireless issue:**

**IMMEDIATE ACTION NEEDED**

**STOP AB 2788**

**Loss of Municipal Regulation of Wireless Facilities on the PUBLIC RIGHT OF  
WAY (PROW), PUBLIC SCHOOLS and all CITY OWNED PROPERTIES.**

Loss of Local Discretionary Review for all of CA

AB 2788 Is heading to the Senate Rules Committee on Tuesday, June 28.  
<https://legiscan.com/CA/bill/AB2788/2015>

Immediate Action is needed to OPPOSE AB 2788.

Excerpt from the City of Calabasas Staff Report dated 6-14-16:

"California Assembly Bill 2788 (AB 2788) was introduced June 14, 2016 by Assembly Member Mike Gatto (Burbank, Glendale). The bill would remove local control of all small cells in any right of way in California. AB 2788 appears to have been written by attorneys for the wireless industry.

AB 2788 would deny local governments locational or aesthetic control over small cells anywhere in the public-right-of-way (PROW). It would give cities or counties 60 days to issue a permit for whatever was requested by a wireless applicant. If the city failed to issue the permit in 60 days, the law would not deem the project approved, it would deem the project permitted."

A Massive Land Grab by Wireless Hits California Legislature  
By Jonathan Kramer, on June 14th, 2016

"The legislation he introduced, ghosted by wireless industry attorneys and helped by other wireless industry firms, would DENY any local government the ability to require a different and less intrusive location, or any different or better design that is more harmonious with the surrounding."

"Mr. Gatto wants to allow his wireless company partners to place all sorts of wireless towers in the public right of way (that's RIGHT IN FRONT OF YOUR HOME) WITHOUT giving you, your city or county, any say in the design or location of the cell site."

"But that's not all: Mr. Gatto's proposed legislation will REQUIRE LOCAL GOVERNMENTS to make ALL OF THEIR PROPERTY...not just the right of way...available for cell sites. Except fire stations."

"Under Mr. Gatto's proposed law, SCHOOLS run by cities or counties would also be fair game for new cell sites, regardless of how the parents might feel about that."

AMENDED BILL: AB 2788  
(2-19-16)

AB 2788 started out as a Natural Gas Storage Emergency Regulation Bill and morphed into a Wireless Bill???  
[http://celltowersites.com/wp-content/uploads/2016/06/20150AB2788\\_97.pdf](http://celltowersites.com/wp-content/uploads/2016/06/20150AB2788_97.pdf)

PLEASE CONTACT YOUR OFFICIALS BEFORE THE JUNE 28, 2016 SENATE RULES COMMITTEE HEARING.

Wireless companies are now looking for future mass deployment of small cell sites on the Public Right of Way and this bill is paving the way for them to deploy without the constraints of municipal oversight.

It is important that we contact our government officials and try to reign in the politicians who are voting for legislation that chips away and erodes municipal authority over the siting of wireless facilities. They have forgotten who voted them into office in the first place and they need to be held accountable.

[National Toxicology Program: Not the First Government Study to Find Wireless Radiation Can Cause Cancer in Lab Rats](#)

## Electromagnetic Radiation Safety, June 3, 2016

The National Toxicology Program's recent study is not the first randomized controlled trial to find that exposure to non-thermal levels of microwave radiation can cause cancer in male rats.

A U.S. Air Force study conducted from 1980 to 1982 which was documented in a series of nine technical reports and later published in the peer-reviewed journal, *Bioelectromagnetics*, found that 18% of 100 male rats exposed to low-intensity microwave radiation for two years developed cancer as compared to only 5% of 100 rats in the sham-exposed control group. The relative risk of developing cancer in the wireless radiation exposure group was 4.46 (p = .005).

<SNIP>

When will the federal government fund the research needed to determine the types and amounts of exposure to cellphone and other wireless radiation that are safe?
