Dear Mr. Nambiar:

Please add this news story and website article on cell phone safety and children's issues, to our PPSI Citizens Petition, (CP) Docket Number ...FDA-2013-P-1374.

"Pediatricians' new warning: Limit children's exposure to cellphones"

link: <http://www.today.com/health/pediatricians-new-warning-limit-childrens-exposure-cellphones-t53541>

This reference is from the American Academy of Pediatrics and please note this section

"Children are not little adults," Dr. Gisela Mercada-Deane, chair of radiology at the American Academy of Pediatrics, said. "The amount of radio frequency that children will be exposed by the time they are our age [an adult] is exponential to the amount of radiation, radio frequencies that we ourselves are being exposed to in a lifetime."

The current FCC test does not take into account that children's skulls are thinner and can absorb more radiation, Mercada-Deane added.

Thank you for all your help in getting our FDA Citizens Petition, (CP) Docket Number ...FDA-2013-P-1374.... ready for the Center for Devices and Radiological Health, U.S. Food and Drug Administration hearing.

Best,

Fred
