Docket No. FDA-2020-P-1393

Dear Shahid Ahmed:

This is in response to your petition received on May 18, 2020, by the U.S. Food and Drug Administration (FDA or Agency), requesting permission to submit an Abbreviated New Drug Application (ANDA) for the following drug product: Levetiracetam in Sodium Chloride Injection, 750 mg/100 mL (7.5 mg/mL). The listed drug product to which you refer in your petition is Levetiracetam in Sodium Chloride, 250 mg/50 mL (5 mg/mL), 500 mg/100 mL (5 mg/mL), 1000 mg/100 mL (10 mg/mL), and 1500 mg/100 mL (15 mg/mL), approved under NDA 202543 and held by HQ Specialty Pharma Corp.

Your request involves a change in strength (total drug content and concentration) from that of the listed drug product (i.e., from 250 mg/50 mL (5 mg/mL), 500 mg/100 mL (5 mg/mL), 1000 mg/100 mL (10 mg/mL), and 1500 mg/100 mL (15 mg/mL) to 750 mg/100 mL (7.5 mg/mL)). The change that you request is the type of change that is permissible under section 505(j)(2)(C) of the Federal Food, Drug, and Cosmetic Act (Act), subject to FDA approval of a petition submitted under that section of the Act.

We have reviewed your petition under section 505(j)(2)(C) of the Act and FDA's implementing regulations at 21 CFR 314.93 and have determined that it is approved. This letter represents FDA's determination that an ANDA may be submitted for the above-referenced drug product.

Under section 505(j)(2)(C) of the Act and 21 CFR 314.93(e)(1), FDA will approve a petition properly submitted under § 314.93 seeking a strength that differs from the strength of the listed drug product unless it finds that one of the grounds for denying such a petition applies.

The Agency finds that the proposed change in strength for the proposed drug product does not pose questions of safety or effectiveness. The uses, dosage form, and route of administration of the proposed drug product are the same as that of the listed drug product. The proposed change is consistent with dosing recommendations in the labeling of the listed drug. In addition, if shown to meet bioequivalence requirements, the proposed drug product can be expected to have the same therapeutic effect as the reference listed drug product. Therefore, FDA concludes that the proposed change would not jeopardize the safe or effective use of the product so as to necessitate significant labeling changes, and investigations are not necessary to show the safety and effectiveness of the proposed strength.

The approval of this petition to allow an ANDA to be submitted for the above-referenced drug product does not mean that FDA has determined that an ANDA will be approved for the drug product. The determination of whether an ANDA will be approved is not made until the ANDA itself is submitted and reviewed by FDA.

To permit review of your ANDA submission, you must submit all information required under section 505(j)(2)(A) and (B) of the Act. To be approved, the drug product will, among other things, be required to meet current bioequivalence requirements under section 505(j)(2)(A)(iv) of the Act. During the review of your application, FDA may require the submission of additional information.

The listed drug product to which you refer in your ANDA must be the one upon which you based this petition. In addition, you must refer in your ANDA to the appropriate petition docket number cited above, and include a copy of this letter in the ANDA submission. 21 CFR 314.94(a)(3)(iii). Please note that once a new drug application is approved for a product that is the same as the subject of an approved petition such petition may not be utilized as the basis for submission of an ANDA.

A copy of this letter approving your petition will be placed on public display in the Dockets Management Branch, Room 1061, Mail Stop HFA-305, 5630 Fishers Lane, Rockville, MD 20852.

Sincerely,

William Chong, M.D.
