**Subject:** Letter to the Editor Consumer Reports

Mr. Nambiar:

would you please be kind enough to add this three page consumer Reports, November 2015, article, to our PPSI citizens petition, **(CP) docket Number ...FDA-2013-P-1374, .**

link: <http://www.consumerreports.org/cro/smartphones/cell-phone-radiation>

Am I not correct in my letter to the editor (see below), that FDA has specific warnings that they recommend for patients and consumers who have defibrillators and pacemakers, that it is unsafe to carry them within 15 cms. of one's body , who have these implants ?

Best:

Fred Mayer, R.Ph., MPH., CEO  
PPSI

Sent as Letter to the Editor today-Consumer Reports

"FDA Says Research Doesn't Link Cell Phones to Any Health Problems"

Dear Editor:

Many, many thanks for your timely and outstanding article "Does Radiation From Cell Phones Cause Brain Cancer-or Doesn't It ?".

Federal US District Edward Chen, of San Francisco, on Monday, September 21, 2015, ruled in favor of the city of Berkeley, California regarding their past ordinance that its citizens have "the right to know" and that customers who own cell phones could expose themselves to dangerous and possible cancer-causing radiation levels.

As an 82 year old senior health care advocate, I have gone through quadruple bypass surgery and have a defibrillator. No one including my cardiac physician or the manufacturer, warned me or my wife, who has a pacemaker, about not carrying my cell phone in my top pocket.

somewhere, at the FDA, there is a citizens petition and supposedly warnings for seniors with pacemakers and defibrillators to keep them 15 cms. away from one's body, due to cell phone radiation.

Thank you for your story. FDA has this information and we consumers have a right to know.

There are 23 scientific studies on cell phone, that our nonprofit group has sent to FDA and can be viewed

by your readers at <http://www.ppsinc.org/cellphone/cell06.htm> and look for cell phone safety month.

Sincerely,

Fred S. Mayer, R.Ph., MPH, President  
Pharmacists Planning Services, Inc. (PPSI)
