Re: Docket FDA-2019-P-4006

Dear Ms. Kolberg:

This letter is in response to your citizen petition (FDA-2019-P-4006) received on August 22, 2019, in which you requested that the Food and Drug Administration amend 21 CFR §101.9(c)(1)(i)(C) to assign a calorie value of 0.2 kcal/gram of fiber to a sub-type of resistant maltodextrin composed primarily of non-digestible oligosaccharides of glucose molecules (minimum of 70%) that are joined by 1,4, 1,6, 1,2 and 1,3 linkages, with a ratio of 1-4 to 1-6 linkages that is less than 2.2.

In accordance with Title 21 of the *Code of Federal Regulations*, section 21 CFR 10.30(e)(2), this letter is to advise you that we have not been able to reach a decision on your petition within the first 180 days of its receipt because of other agency priorities and the limited availability of resources. When we complete our review of your petition, we will notify you of our decision.

Please let us know if you have any questions.

Sincerely,

Claudine Kavanaugh, PhD, MPH, RD
