Petition # 2006P-0403
Withdrawal of Citizen Petition

Dear Sir/Madam:

In accordance with 21 CFR 10.30, B. Braun Medical Inc hereby request withdrawal of the above mentioned Citizen's Petition. This petition was originally submitted on 9/29/06 with the purpose of determining whether an Abbreviated New Drug Application (ANDA) could be filed against the listed drug Novamine® 15%, manufactured by Hospira under NDA 17-957. The petition was then amended on 11/30/06 to determine if B Braun Medical could also package their proposed finished product in a 2L glass bottle (PBP) instead of a 500 mL glass bottle (PBP), which the Novamine product was approved for.

On March 21, 2007 B Braun Medical was informed by Ms. Margareta Simms of the FDA that the Orange Book had been updated to reflect Novamine as the Referenced Listed Drug (RLD). She had also informed B Braun Medical that the Citizen's Petition# 2006P-0403 would need to be withdrawn and a Suitability petition would need to be filed in order for the Agency to determine if the change in the container size from the RLD was appropriate.

At this time B. Braun Medical requests withdrawal of Citizen's Petition# 2006P-0403 without prejudice to future filings.

If you should have any questions regarding this withdrawal, please do not hesitate to contact Bernadette Attinger via telephone at (610) 596-2504, facsimile (610) 596-2502 or email at bernadette.atinger@bbraun.com.

Sincerely,

Bernadette Attinger
Regulatory Affairs Manager
